PREMIER AUTOMOTIVE EXPORT LTD.

PRESS RELEASE

Date: 11/19/22 | **Release Date:** FOR IMMEDIATE RELEASE

First U.S. License to Sell 100% Electric Scooters and Vehicles in Cuba

Effective November 17th, **Premier Automotive Export, Ltd**. (PAE) makes history as the first company to recieve an import license from the U.S. Department of Commerce to sell **100% electric** scooters and vehicles to Cuban nationals and the approximate **2,500 private businesses** in Cuba. This marks one of the first major events in Cuba's transportation industry since the U.S. imposed a trade embargo in 1961.

John C. Felder, President, CEO and founder of Miami based PAE, was the recipient of this license. John recently visited Cuba to represent his company at the 2022 FIHAV Expo in Havana. Attendees were given the first glimpse of what PAE will offer Cubans as he displayed an all electric scooter on the expo floor. Other vehicles offered will include the **Nissan Leaf** and **Chevrolet Bolt**.

Through John's tireless efforts importing all electric vehicles to the Caribbean over the past 15 years, he now will be able to provide the citizens of Cuba with transporation options that will have a healthy impact on the island's environment. Premier Automotive Export will also introduce bidirectional charge stations for the first time in the Caribbean which have the potential to reduce the number of blackouts in Cuba.
